A detailed illustration of a Wild Turkey (Meleagris gallopavo) standing in a natural setting. The turkey is shown in profile, facing right, with its head turned slightly back. It has a large, dark, iridescent body with a pattern of dark spots and lines. Its tail feathers are long and dark. The turkey is standing on a patch of ground with some dry leaves and twigs. In the background, there are several tall, thin, bamboo-like plants with long, narrow leaves. The overall style is that of a classic scientific or natural history illustration.
